

Plant Protein Series

Fava Bean

88% Protein Content

Fava bean or Broad bean Protein is our newest addition to our increasing range of high quality Plant proteins.

This innovative plant protein is a complete protein ensuring it contains all the 9 essential amino acids in the correct proportions required for the body.

This protein has a very mild taste and good mouthfeel, both factors which play a large role in plant based proteins. The flavour of Fava bean protein is milder than pea protein which means it can be used in a variety of different functions and a great alternative to traditional plant proteins

Key benefits

- 100 % Allergen free
- Vegan friendly
- KOSHER
- Non-GMO

Recommended industry usage:

- Sport nutrition
- Production of vegetarian and other personalized foods.

Why choose Fava?

High in Fibre - Contributes towards the maintenance of normal bowel function.

Vitamin B6 - Contributes to normal hormonal activity, normal function of the immune system, normal red blood cell formation and protein and glycogen metabolism.

High levels of Magnesium - Contributes to the reduction of fatigue, contributes to normal energy-yielding metabolism, and functioning of the nervous system.

Suitable for everyone- Fava bean protein is naturally allergen free, and is powered by plants. This protein source can be taken by anyone who is looking for healthy ways to boost their protein intake.
