CLA

CLA 1000mg

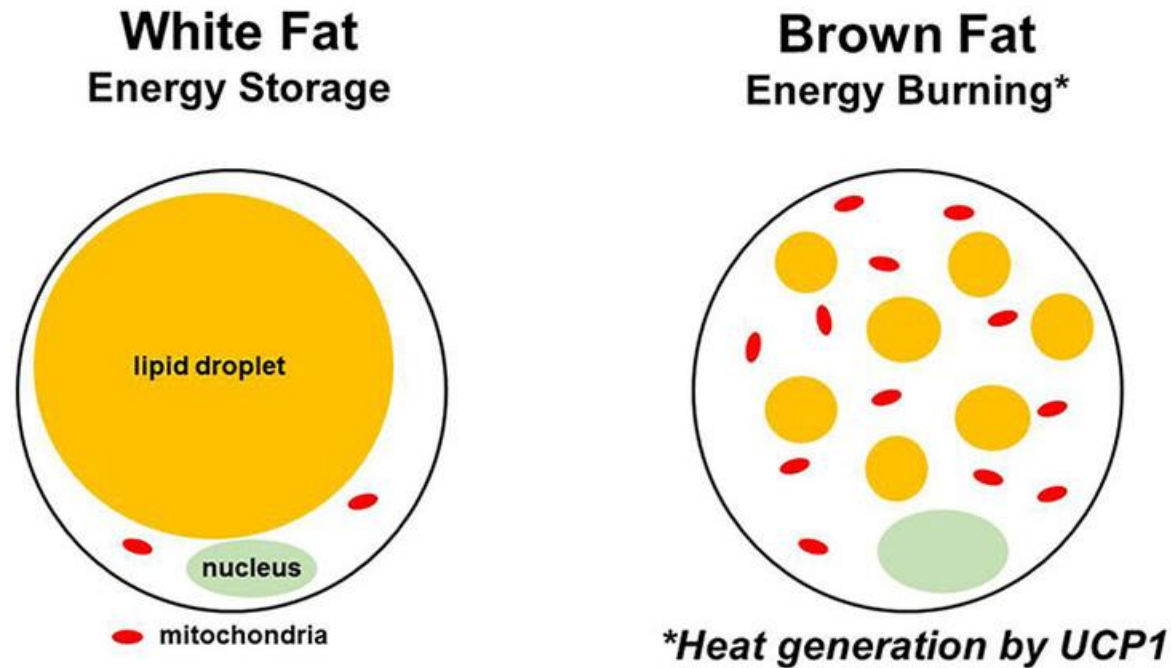

CLA + EPA +DHA +GLA

CLA + Acetyl-L-Carnitine
+ Green Tea

Brown Fat

- **White Fat** is simply an energy reserve storing all the excess calories you overeat as the Ugly Fat you really want to lose like your belly fat, love handles, flabby arms& etc.
- **Brown Fat** burns off your ugly white fat to get the energy it needs to generate enough heat to keep you warm.

Way to Increase Brown Fat.

Melatonin not only helps you sleep better but studies also show melatonin increases the amount of brown fat you have.

Forskolin

Forskolin works great to improve your metabolism, break up stored fat cells and give your more energy while suppressing your appetite. This is the perfect recipe for a healthy weight loss transformation.
