

EXPERT OF PLANT-BASED PROTEIN

21

WHO WE ARE

Pioneer of Plant Protein

We are one of the first companies who brings the plant-based protein into Europe and USA. We know exactly how to use these gifts from nature. We have studied different raw materials especially Rice & Pea to ensure the quality from original source, and the best quality material for production. We trust plant-based protein would be significant supplements with its nature, safe and sustainable features.

WHY PLANT PROTEIN?

For a long time, Whey has been the gold standard so what does Whey have over plant protein? With the rise in demand for dairy free protein sources, manufacturers are looking to provide consumers with a product that can stand up to whey, in taste as well as performance.

Whey protein is a complete protein, that is all the essential amino acids are there in the correct proportions with no limiting amino acids.

Traditional plant proteins can be lacking in the correct proportions of amino acids, for example Pea can be lacking in Leucine and Rice in Lysine so it makes sense to combine them at a 50/50 ratio to make a complete protein source. Recently it has also become common to add multiple plant proteins together to achieve a full amino acid spectrum as well as getting the added benefit of a wide range of vitamins and

QUALITY CONTROL

For years, we have been devoting ourselves to providing qualified materials to our customers. To make this happen, we have continuously involved in controlling both raw materials and in-line production.

We have also built a series of certification together with manufacturer to ensure safety of our products:

- GMO Free / Allergen Free / Low Heavy Metals / Good Taste & Flavor/ Melamine Free
- ISO9001 / ISO22000 / BRC / KOSHER / HALAL / Organic certificate in EU and USA

WHAT WE HAVE:

Rice Protein

- Sports Nutrition
- Food and beverage
- Animal nutrition
- Wellbeing

Brown Rice Protein

Highly popular and a great source of fiber, our rice protein fulfills needs of those who seek a complete protein source from a plant-based source. All our rice protein is produced from high-quality brown rice with Non-GMO standard.

- Rice Protein 80% 300 mesh
- Rice Protein 80% 600 mesh
- Rice Protein 80% 800 mesh
- Organic Rice Protein 80% 300 / 600 / 800 mesh

WHAT WE HAVE:

Pea Protein

Our pea protein is produced from crushed, dried peas, producing a mild flavored and light-colored protein powder that is suitable for a wide variety of applications. We offer various grades of protein concentrate to ensure you get the right product for your needs.

- Pea Protein 80%, 85%
- Organic Pea Protein 80%
- Pea Protein 85B/85C
- Pea Fibre

What is Pea Protein 85B?

One of the main deficiencies from traditional pea protein is that it's hard to be used in meat product due to limited water binding capability. Our new grade Pea Protein B85 has great improvements on nitrogen solubility index which could ensure pea protein to be better used in meat

WHAT WE HAVE:

Fava bean Protein

- Sports Nutrition
- Food and beverage
- Animal nutrition
- Wellbeing

Fava Bean Protein

Fava bean is part of the legume's family and like pea protein, offers a fantastic solution to plant based nutrition. It has a mild coloring and taste, ideal for use in powder blends and bars. With a high protein concentrate of 85%, our Fava Bean Protein is a great alternative to traditional pea and rice protein.

Key Benefits:

- High Percentage of Protein (min 88% crude protein)
- Absence of allergens (gluten, lactose) and anti-nutrients
- Suitable for vegetarian, lean, halal and kosher foods
- Non-GMO
- High in Fiber
- Mild Flavor
- High levels of Magnesium
