- Sleep apnea and breathing problems
- Many types of cancer
- Low quality of life
- Mental illness such as clinical depression, anxiety, and other mental disorders^{4,5}
- Body pain and difficulty with physical functioning⁶

Obesity is a complex disease involving an excessive amount of body fat. Obesity isn't just a cosmetic concern. It is a medical problem that increases your risk of other diseases and health problems, such as heart disease, diabetes, high blood pressure and certain cancers.

There are many reasons why some people have difficulty avoiding obesity. Usually, obesity results from a combination of inherited factors, combined with the environment and personal diet and exercise choices.

The good news is that even modest weight loss can improve or prevent the health problems associated with obesity. Dietary changes, increased physical activity and behavior changes can help you lose weight. Prescription medications and weight-loss procedures are additional options for treating obesity.

HOW TO MANAGE YOUR WEIGHT?

Relevant research shows that effective weight management can prevent diabetes, hypertension and other chronic diseases caused by obesity, improve health status and quality of life, and save corresponding medical expenses.

At the same time, in the era of beauty economy, young consumers pay more and more attention to their body and weight, and the healthy and scientific way to lose weight is gradually sought after. Common weight management products include diet substitutes, nutritional supplements, weight-loss tea and weight-loss supplements. According to Euromonitor's statistical forecast, the weight management market in North America will reach 4.2 billion US dollars in 2015, which is expected to grow slowly, with a compound growth rate of about 2% in the next five years.

By 2020, the weight management market in North America will reach 4.7 billion US dollars. In 2016, the market scale of China's weight management products was 10.3 billion yuan. In the future, with the popularization of publicity and education and the transformation of consumers' concept of slimming from simple and blind diet to more healthy and scientific weight management mode, it is expected that China's weight management products market will still maintain a growth rate of 10% - 20%, and will be close to 20 billion yuan in 2022.

INGREDIENTS WE SUGGEST:

WHAT'S NEW:

Forskolin works great to improve your metabolism, break up stored fat cells and give your more energy while suppressing your appetite. This is the perfect recipe for a healthy weight loss transformation.

TYPICAL COMBINATION:

● Conjugated Linoleic Acid

- Free radical scavenging
- enhance the anti-oxidant and immune ability of human body
- regulate blood cholesterol and triglyceride levels
- promote oxidative decomposition of fat
- promote human protein synthesis

● Carnitine

- Promote the oxidation of fatty acids;
- Promote the utilization of carbohydrate and amino acid;
- Improve the tolerance of the body and prevent the accumulation of lactic acid;
- As a heart protective agent, it can accelerate sperm maturation and improve sperm vitality;
- Anti aging and anti-oxidation;
- Reduce blood cholesterol and triglycerides; lose weight

● Green Tea Extract

- Hypolipidemic effect
- Antioxidation
- Antitumor effect
- Sterilization and detoxification
- Anti alcohol and liver protection
- Detoxification
- Improve immunity
